## **The International Association for the Integrational Study of Language and Communication**

The IAISLC was founded in 1998. It is managed by an international Executive Committee, whose members are:

Adrian Pablé (SUPSI), Secretary  
David Bade  
Charlotte Conrad (Dubai)  
Stephen J. Cowley (University of Southern Denmark)  
Daniel R. Davis (University of Michigan)  
Dorthe Duncker (University of Copenhagen)  
Jesper Hermann (University of Copenhagen)  
Christopher Hutton (University of Hong Kong)  
Peter Jones (Sheffield Hallam University)  
Nigel Love (University of Cape Town)  
Sinfree Makoni (Penn State University)  
Rukmini Bhaya Nair (Indian Institute of Technology)  
Talbot J. Taylor (William & Mary)  
Michael Toolan (University of Birmingham)

## **Introduction**

In 2023 the International Association for the Integrational Study of Language and Communication (IAISLC) celebrated its 25<sup>th</sup> anniversary. In 2015 IAISLC will celebrate the tenth anniversary of its first publication: working with Charlotte Conrad and the late Rita Harris, the editor compiled a bibliography of publications by and about Roy Harris that was the first publication issued by the IAISLC. Since that bibliography appeared in 2015 IAISLC has published a series of collected papers by several of its members, and this year the first monograph was published.

My original aim for a publishing project was to make writings by members of the association easily and cheaply available. It was in fact a rather selfish move: having lost my library privileges upon retiring, most of what I had always been able to obtain freely and easily was suddenly only available if I were willing to pay on average 40\$ per article. To obtain the 1000+ items listed in the bibliography would have cost me about 40,000 USD. In contrast, by purchasing everything in this catalogue the reader can obtain 160 articles (not counting prefaces and introductions), 1 bibliography and 1 monograph for a whopping 359\$ USD, which is approximately 2.22\$ USD per article. And the authors will each receive all of the monies not taken by the printer and the distributors.

The editor, David Bade

Lars Taxén is an associate professor from Linköping University, Sweden. In addition to his academic career, he has more than 30 years' experience from the telecom industry, where he worked with system development methods, processes, information modelling, and information systems. His research interest is focused on the dialectical constitution of the individual and the social, both from a practical and theoretical point of view. Integrationism is a central element in his theory. He has published *Using activity domain theory for managing complex systems* (Hershey: Information Science Reference, 2010), several book chapters, and various journal and conference articles.

For the past 40 years Talbot Taylor has argued for the distinctively reflexive character of human language and discursive practices. The seven papers included here explore the implications of this argument for various fields of language research, including linguistic theory, linguistic anthropology, language acquisition, language evolution, folk psychology, cognitive science, linguistic historiography, and the philosophy of language.

In this volume Taylor argues that in the child's acquisition of language the distinctively linguistic identity of language emerges only gradually, by means of the child's increasingly competent participation in the scaffolded discursive processes of reflexive enculturation. The papers included here explore the implications of this argument for research on developmental linguistics, metalinguistic discourse, socio-cognitive development, ecological psychology, the enactive philosophy of mind, and the philosophy of language.

**Integrationism and Language Ideologies** is a print edition of a special issue of the online journal **Fórum linguíst!co** **volume 19 | special issue | feb. 2022** available free of charge for downloading at the following web address:

<https://periodicos.ufsc.br/index.php/forum/issue/view/3325>

This print edition is issued by The International Association for the Integrational Study of Language and Communication in association with Programa de Pós-Graduação em Linguística, Universidade Federal de Santa Catarina, and was edited by Atilio Butturi Junio, UFSC.

This volume originated with papers presented at the online conference entitled *Integrationism and Language Ideologies* (March 15-20, 2021), which was organized by the Language Policy Group of the Federal University of Santa Catarina in conjunction with the *International Association for the Integrational Study of Language and Communication* (IAISLC). The contributions in this issue are for the most part revised versions of the conference papers presented at the event. The special issue also features an interview with David Bade as well as a Portuguese translation by Cristine Severo and Ana Cláudia Eltermann of one of Harris' texts (*The integrationist critique of orthodox linguistics*). The present volume introduces key ideas on Roy Harris' integrational linguistics to a Lusophone readership by highlighting relevant issues in language ideology, linguistic methodology, decolonial linguistics and (socio)-linguistic theory. The various contributions all underline the necessity to rethink (or 'demythologize') the semiological and philosophical foundations of orthodox linguistics and a need to develop a theory of communication in which language is treated as an integrated mode rather than a segregated object.
